

VENDOR RATINGS

VIVE Vendor Ratings are a great way to share vendor performance within your organization.

VIVE utilizes a simple 10 question survey for users to answer, then automatically assigns a 1-5 star rating. In seconds, a user can easily answer the short list of questions and the results are stored within the vendor profile. The vendor's rating will display in the search results and is displayed to all users. A vendor rating is an average of all entered ratings by all users and is a valuable asset of vendor management.
